A short service of prayer, reflection and action
on climate justice with friends from around the
world.

In November,

world leaders should have been gathering in Glasgow for COP26, the crucial UN climate conference that has now been postponed until November 2021.

To mark the original date, and to reflect on our role in pushing for more ambitious climate action in the coming year, we will gather from all over the world for a short service of prayer and reflection.
